Get it done.
Fairly.
Through trusted local mediation.

No public listings. No direct contact. No shortcuts.
Ethiopia's structured platform where every request goes through a neutral operator before reaching a verified local agent.

Submit Your RequestJoin as Agent

How Erkata Actually Works

1

Submit Your Need

You fill a structured form describing exactly what you want (property, furniture, service...). Your request goes **only to an operator** in your area — never public.

2

Neutral Mediation & Matching

A certified local operator reviews your request, validates it and assigns it to the most suitable subscribed agent according to:

- Geographic zone
- Agent tier & specialization
- Current availability

3

Delivery + Protected Feedback

The agent delivers the service or transaction. Both sides submit feedback through the operator. Only bundled, anonymized feedback reaches higher levels — final resolution always requires Super Admin approval.

Who Is This For?

Requestors
(Buyers / Sellers)

You want transparency, zone-respecting service and protection against unverified intermediaries.

Submit a Request →

Agents
(Executors)

You want qualified, pre-validated leads in your operating zones without competing in a public free-for-all marketplace. Higher tiers = more referral income + larger geographic rights.

Become an Agent →

Operators
(Neutral Mediators)

You want to play a respected, paid mediation role in your community while enforcing structure and fairness.

Apply as Operator →

Choose Your Path as Agent

Referral commission applies only to first-generation (direct) referrals. Higher tiers unlock significantly more earning potential through referrals and wider zone rights.

Package	Referral Slots	Free Zones	Geographic Access	Status
Free	3	1	Very limited	Basic
Peace	7	2	Small expansion	Paid
Love	16	3	Medium coverage	Paid
Unity	23	5	Large coverage	Paid
Abundant Life	31	Unlimited	Full map-based access	Premium

Structure

Local. Zoned. Accountable.

Agents can only accept and fulfill requests inside zones they have rights to.

Zones follow Ethiopia's administrative divisions (kifle ketema / woreda). Higher-tier agents progressively unlock larger territories.

This structure protects both requestors and agents from unqualified long-distance matching.

Zone Rights Visualization

Trust is not promised.
It is enforced.

Every transaction has a neutral operator in the middle

No hidden direct contact before validation

Immutable feedback escalation chain ending at Super Admin
